

As a taxpayer who pays way too many taxes, I am appalled that my tax money is being wasted in Congress debating issues like the broadcasting of traffic and weather! I have purchased an XM radio for my car to eliminate the trash talk and mindless babbling of "conventional" radio stations and I don't want XM's superb delivery of a fine product disrupted by the "good old boys" of the National Association of Broadcasters. Haven't they ever heard of raising your business standards and product quality to that of their competitors? That's the way the rest of us work. Get with the program!! I did, with XM satellite radio and I'll never listen to conventional radio again. Please, please FCC leave a good thing alone and deal with the trash on conventional radio that many others have to still listen to. I respectfully request you to reject heartily the NAB's petition 04-160.Regards,
Donna Melick
